Environmentally Friendly Marine Foam.

For more than 40 years, Foam Supplies, Inc. has been providing the marine industry with versatile, innovative and reliable polyurethane foam systems and dispensing equipment for a wide range of needs. No other company can match our successful track record in the production of boats, docks, navigational markers, buoys, life rings and much more.

Today, we’re also proud to say that FSI is the only polyurethane manufacturer to offer the industry a proven environmentally friendly option with our ecomarine® flotation foam. Because it’s made with our proprietary ecomate® liquid blowing agent (LBA) technology, ecomarine does not contribute to global warming, ozone depletion or smog production (does not contain VOCs), and is not a marine pollutant. It also complies with US Coast Guard requirements under Title 33 CFR.

Ecomate has been US EPA SNAP approved since 2003, making it an ideal replacement for HFCs recently targeted for phase-out by the EPA, including HFC-134a. That means ecomarine is a proven, easy way for boat makers to transition away from HFC-based systems, typically with minor to no changes in processes or equipment.
FSI's ecomarine™ polyurethane foam provides excellent flotation properties, while also adding structural integrity. But we also offer other products – like ecofoam™ and ecoflex™ – that are perfect for maritime applications such as boat seating, cushions, steering wheels and more. Plus, all of these foams are specially blended for marine use to resist water absorption.

In addition to being a key component in the manufacture of new products, ecomarine foam may also be used for marine repair in everything from personal watercraft and docks to commercial barges, as well as in performing salvage work. And for smaller, do-it-yourself consumer projects, FSI even offers convenient and easy-to-use Marine Foam Kits in a variety of sizes (available at fsifoamkits.com).

No matter what your marine application, from rigid foam to flexible foam to dispensing equipment and more – plus expert advice and support from the industry leader in polyurethane technologies – count on Foam Supplies.

While boat manufacturers know us for our marine flotation foam, Foam Supplies also supplies polyurethane foam systems for cooler and live well insulation, boat seating, cushions, steering wheels and so much more!
